Run 1 dates change due to cold weather

As all of you already know, the weather has not been too frog friendly lately. Please note: Run 1 dates are being adjusted so that we can hopefully make up for the late spring here in Indiana. The monitoring period for Run 1 will now be:

**TUESDAY, MARCH 4 -
MONDAY, MARCH 31**

Minimum temperature requirements will not change. Run dates for 2 and 3 will remain the same as well.

National route holders assigned observer numbers

Those of you who were assigned a National driving Route should have received an e-mail with your observer number, route number, and database access information. Please take a look at the database and let me know if you have any questions. Also remember to mail me a copy of your route and stops.

If you have to establish the stops yourself, I MUST approve them and add them to the database before you can enter any data. If you received a list of stops in your route packet, you do NOT need to send them in.

Training sessions successful

Six separate training sessions were held throughout the state from late January to mid-February. Indiana has a total of 56 National Routes available for volunteers. Currently there are only 9 left! Way to go Indiana!

That means, if any volunteer attended training and did not get a National driving route and would still like one, please let me know.

Routes Available:

Lewis: on the Sullivan-Vigo County line

Newburgh: on the Vanderburgh-Warrick County line near Ohio River

Terre Haute: Vigo County

Cedar Grove: Eastern Dearborn County by Ohio State Line

Naab: Northeast Clark County

Young America: Cass, Carroll and Howard County lines

Greenville: Southeast Washington County

Lexington: Southeast Scott County

New Market: Southeast Montgomery County near Boone and Hendricks

Local routes not forgotten

If you provided me with your contact information to establish Local Routes...I have not forgotten you! You should receive and e-mail notice from me within the next few weeks.
